

- ✓ Website Design
- ✓ Payment Form Development
- ✓ Online Store Integration
- ✓ Professional Website Hosting

JG Web Technologies is an industry-leading provider of web related products and services for small, medium and large-sized businesses. Our comprehensive suite of web services includes website design, electronic payment form development, online store integration and professional website hosting. Along with years of expertise in both electronic payment integration and technology services, JGWT strictly follows a customer-first business model in which each of our clients--no matter how big or small--receives personal customer service from a dedicated account manager. We pride ourselves in our service and exceptional customer support.

Our team of professional web developers are experts in building powerful, elegant and effective business web sites. No matter what size business you operate, from small to corporate, JG Web Technologies is your solution for professional online product representation.

JG Web Technologies payment forms allow you to accept credit card and electronic check payments directly through your website. They combine ease of use with the highest levels of security, assuring your customers they are protected throughout the payment process.

Our online stores are virtually maintenance free. We provide you with an administrative console from which you have full control over your products. Some of the included features are: product inventory, customer tracking, newsletter management, gift certificates and so much more.

JG Web Hosting provides professional website hosting, domain registration, SSL certificates and advanced marketing tools.

We build it - You profit!

You're never Alone!

JG Web Technologies
is there to help!
